

Enable Multi-factor Authentication on Authenticator app (Microsoft/Google)

Follow the steps to authenticate your application via authenticator app:

- Download the authenticator application (Microsoft/Google) in your phone and login with your account.
- Click on the add (+) account or add icon button.

- Choose Other as the account type.

- Next, point your camera at the QR code to scan.

- It will generate a 6-digit OTP.

- Go to surgeon-signup screen and enter the 6-digit OTP.

Multi-factor Authentication

Scan the QR code

Enter the code shown in your authenticator app

Verify

After these steps, MFA will be activated for your account so you will encounter MFA prompt during login. Enter the code shown in your authenticator app.

To keep account secure, we verify your identity.
Enter the code generated by your authenticator app.
